**ABSTRACT.** Ten genera of Ocydromiinae (Diptera: Hybotidae) are recorded from the Australasian Region, including *Leptodromia* Sinclair & Cumming, 2000. The endemic Australian genus *Leptodromia* is revised with seven species recognized, including six new species (*L. bickeli* Barros & Sinclair sp. nov., *L. castanea* Barros & Sinclair sp. nov., *L. immaculata* Barros, Freitas-Silva & Sinclair sp. nov., *L. lineata* Barros & Sinclair sp. nov., *L. nebulosa* Barros & Sinclair sp. nov. and *L. t-maculatum* Barros, Freitas-Silva & Sinclair sp. nov.). The type species, *L. bimaculata* (Bezzi, 1904) is redescribed. An identification key to species is provided and the species distributions mapped.
